### **Celcite named in Washington SmartCEO 2010 Fast Growth Companies**

*Pioneering provider of wireless network management and optimization tools wins latest  
in string of awards for rapid growth and innovation*

**Herndon, VA, USA: January 22nd, 2010** — Celcite Management Solutions ([www.celcite.com](http://www.celcite.com)), the world's leading provider of network optimization tools for wireless networks, today announced that it had been named by Washington SmartCEO magazine as one of the publication's fifth annual Future 50 winners, in partnership with Clifton Gunderson LLP. The Future 50 program recognizes the 50 fastest-growing companies in the Greater Washington area, based on employee and revenue growth. The awards will be presented at a ceremony that will take place on January 28th, 2010, at the Hyatt Regency Crystal City in Washington DC.

"This award is a testament to the strength of the business and technical strategy that Celcite is pursuing, and recognizes the excellent growth we've been able to achieve due to the success of our innovative network optimization tools," said Rahul Sharma, the President and CEO of Celcite Management Solutions. "With the ever-increasing demand for mobile broadband data, and new mobile networks being rolled out all over the world moving forward from 2G and 3G technologies to LTE and 4G, we hope to be able to sustain a similar level of growth for many years to come."

Celcite was also named among Washington's fastest growing companies by the Washington Business Journal in its annual Fast 50 awards in October 2009.

In May 2009 Rahul Sharma was named as a finalist for the Ernst & Young Entrepreneur Of The Year® 2009 Award in the Greater Washington region, an honor he had already previously received in 2007. According to Ernst & Young LLP, the awards program recognizes

entrepreneurs who demonstrate extraordinary success in the areas of innovation, financial performance and personal commitment to their businesses and communities. Mr. Sharma was selected as a finalist from nearly 100 nominations by a panel of independent judges.

Celcite's flagship network optimization product COPS is a multi-vendor, multi-technology solution, capable of managing a diverse set of data sources through a single unified platform. It uses Automatic Intelligence Correlation (AIC™) in the form of embedded engineering expertise to provide automatic root cause analysis and executable solutions. COPS has been developed to bring about a paradigm shift from 'person centric' to 'automation centric' network optimization and management techniques.

Celcite is exhibiting at Mobile World Congress 2010 in Barcelona on 15th - 18th February 2010 at Stand 2C108 in Hall 2.
